Kepada: Putri Suryandari <putrisyd@gmail.com>

15 Januari 2020 21.41

Dear Authors,

This to confirm that based our record from your paper submission via EasyChair system we found there are 60 papers requested their paper for publication in the journal of Geographia Technica. This assumption is based on their paper were written following the journal template.

However, based on our CUSME account per 15 January 2020, we have detected that paid for publication in the journal is only for paper ID: 1, 18, 23, 31, 40, 90, 100, 101, 105, 109, 110, 152, 160 and 165 (15 papers).

As announced in the previous email, we only proposed the paper to the journal who has paid the publication of USD 150 (or, Rp. 2,250,000).

This is to double confirm that if you are interested in publishing your paper to the journal, please complete the payment on January 20, 2020. Please do not wait you will pay after the conference at which your paper is accepted by the journal. This will not catch up publication in a special issue in March 2020.

Our problem is that the bureaucracy is too complicated wasting time. On the other hand, those who have paid for the above publications are also not sure whether their papers will be accepted or not. This will be purely assessed by the editor-in-chief of the journal. The CUSME function is to facilitate the paper for possible publication while the accepted paper for a special issue is very limited.

If you are in doubt, please turn to Book Chapters. This is more flexible because it is only likely to be published around June 2020. CUSME has full rights to manage the quality of papers to be published.

If you would like more information or advice about this publication, you are welcome to contact CUSME 2020 Committee, or directly to email: [wayan.suparta@upj.ac.id](mailto:wayan.suparta@upj.ac.id).

Sincerely,

The Publication Committee
