The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

Dear Mr. Hari Soetanto:

We have reached a decision regarding your submission to Indonesian Journal of Electrical Engineering and Computer Science, "Drug Suitability Evaluation Based On Patient Health Condition with Improved Profile Matching Method".

Our decision is to: ACCEPT with minor revisions

Please prepare your final paper. Read the checklist for preparing your final paper for publication at: <http://iaescore.com/journals/index.php/IJEECS/about/editorialPolicies#custom-3>. Please try to follow the format as closely as possible.

In preparing your final paper, you should pay attention to:

1. Introduction: The issue, needs, specific problem, and way of addressing it in this experiment or study, often described in SEVERAL paragraphs. An Introduction should contain the following three (3) parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.

- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.

- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

2. Results and Discussion;

Results: Description of the results or findings in SEVERAL paragraphs; and Discussion: Extended discussion of the results--what they mean, what will or can happen next, what other experiments might be fruitful, etc.

3. Please ensure that: all references, tables, figures and equations have been cited in your text; Each citation should be written in the order of appearance in the text; The references must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4], The references must be integrated also with not less than three (3) papers published on IAES's Journals. You can find the issued at:

The English is satisfactory, but:

1. The title is less appropriate with regards to the discussion of hypertension on the content.
2. Abstract contains the essential information for the paper.
3. Some figures are in bahasa.
4. The discussion in the context of the work is sufficient.
5. Research gap or the state of art of the research should be discussed. The paper contains significant contributions but does not present the advancement of the object.
6. The paper contain a quite clear conclusion.
7. The references to the related work are mostly adequate.
