

Welcome Message from General Chair of IES-ETA 2018

Assalamu Assalamualaikum Wr. Wb.

Welcome to the IEEE International Electronics Symposium on Engineering Technology and Applications (IES-ETA) 2018 as a part of the 20th International Electronics Symposium (IES) 2018, being held in Bali, Indonesia from October 29-30, 2018. It is my great honor in declaring this conference open. IES-ETA is one of the primary IEEE forum in Indonesia for publication and technical exchange of the latest research and innovation and brings together academia and industry to share and evaluate the technology related to Electronic and Computer.

This year, we have prepared a comprehensive program consists of several keynote speeches delivered by Prof Naoyuki Kubota (Tokyo Metropolitan University, Japan), Prof. Yasushi Kyoki (Keio University, Japan), Prof. Hazlie Bin Mokhlis (University of Malaya, Malaysia), and Prof. Jiwa Abdullah (University Tun Hussein Onn, Malaysia). The conference has received 96 submitted papers and 51 papers have been accepted by the committees for presentation and to be included within the IES-ETA 2018 Proceedings. These papers on various topics are divided into 10 parallel sessions in the conference.

I would like to express my deepest gratitude to all the dedicated organizing committee members from around the world and the technical program committee members for coming up with an excellent technical program. I would also like to thank the management of Politeknik Elektronika Negeri Surabaya, and the IEEE Indonesia section for their great assistance and support. Without all of their support, IES-ETA2018 would not have been possible.

Enjoy IES-ETA 2018 and the paradise of Bali.

Wassalamualaikum, Wr. Wb.

Tri Budi Santoso (IES 2018 General Chair)
Tri Harsono (IES-ETA 2018 Program Chair)
